

CSIR Integrated Skill Initiative

Pathological Tools & Techniques for Biomedical Applications

CSIR-CDRI

CSIR-CDRI is a unique R & D Institution in the country with state of the art infrastructure for newdrug discovery and development from "Concept to Commercialization". It is poised to become a global leader through cutting edge science & technology. For New India, the Institute is re orienting itself into a multidisciplinary nodal centre for development of drug for the unmet medical needs as well as the expectation of the industry. While focusing on the discovery & development of drugs, the institute is aligned & contributing towards the national missions programmes such as Make in India, Swatch Bharat, Skill India, Digital India, Start-up India, Accessible India and Sashakt Bharat.

This program is aimed at training candidates for the job of a "Medical Laboratory Technician" in the "Health care" Sector/ Industry/ Diagnostic Technician and aims at building the following key competencies amongst the learner.

CSIR-CDRI invites applications for the course as per the details given below:

Title of the Course : Pathological Tools & Techniques for Biomedical Applications

Duration : 06 Weeks (19th June to 31st July 2024)

No. of Seats : 20

Educational Qualification: Minimum intermediate pass out in science field

Venue of the course : CSIR-CDRI, Lucknow

Course Fee : Rs. 10,000/-Last Date for submission : 09th June 2024

of applications

Course Coordinator Training Outcomes

: Dr. Madhav Nilakanth Mugale (E-mail: madhav.mugale@cdri.res.in)

: After completing this training program, participants will be able to:

- Describe the health care sector and diagnostic services
- Perform clinical skills essential in providing basic diagnostic services such as Correctlycollect, transport, receive, accept or reject and store blood / urine/ stool and tissue samples, etc.; Conduct analysis of body fluids / samples; Maintain, operate and clean laboratory equipment; Provide technical information about test results; Prepare and document medical tests and clinical results; etc.
- Explain quality assurance in Laboratory works
- Histopathology slide preparation
- Blood analysis
- Urine analysis
- Haemato-biochemistry
- Special staining of histopathology slides
- Post mortem technique
- Microbiology agar preparation and plating
- Practice infection control measures
- Ensure readily availability of medical and diagnostic supplies
- Demonstrate techniques to maintain the personal hygiene needs
- Demonstrate actions in the event of medical and facility emergencies
- Exhibit professional behavior, personal qualities and characteristics of a MedicalLaboratory Technician
- Understanding the pathogenesis, data interpretation in research work
- Demonstrate good communication, communicate accurately and appropriately in the role of Medical laboratory Technician

Guidelines for Assessment

- 1. Criteria for assessment for Each Performance Criteria (PC) will be assigned marks proportional to its importance.
- 2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC
- 3. Individual assessment will create unique question papers for theory part for each candidate ateach examination/training center (as per assessment criteria below)
- 4. Individual assessment will create unique evaluations for skill practical for every student at each Examination based on training criteria
- 5. To pass the Qualification Pack, every trainee should score as per assessment grid.
- 6. Passing % will be 60% for each (theory and practical).

Curriculum

S.N	Module	Key Learning Topics
1.	Healthcare Systems, Laboratory & Delivery	 Introduction to Pathology Understanding the basic principles of pathology Functions Understanding various Diagnostic Centers and medical laboratory facilities
2.	Role of the Pathology Technician	 To develop broad understanding of the Role of diagnostic pathology technician To identify Laboratory maintenance needs to be taken care by pathology technician To exhibit Ethical Behavior Welfare and Ethical consideration during running of laboratory or animal
	Practical	experimentation?Various types of record/ SOP in the laboratory/ Hospital
3.	Structure and Function of Human Body/ animal body	 Basic understanding of organization of body cells, tissues, organs, organ systems, membranes and glands in human body (Human / animal) Understanding basic unit of body-Cell Understanding different parts of body
	Practical	 Preparation of various reagent and stain (10% NBF, Leishman stain, Giemsa stain, Hematoxylin & Eosin stain) Principles of NABL and GLP accreditation and visit to lab.
4.	Body Fluids	 Elementary knowledge of chemistry Understand blood cells in detail Understand Haemostasis & Coagulation Mechanism and testing in detail
	Practical	 Blood sample collection: Human and rats To gain broad understanding of correct procedure of sample transportation
5.	Introduction to Laboratory related Medical Terminology	 To gain broad understanding of different types of samples to be taken in medical laboratory To gain broad understanding about Sample Handling To gain broad understanding of correct method of blood sample collection.
	Practical	Hemoglobin and E.S.R. estimation
 7. 	Personnel Hygiene	 To be equipped with Techniques of Use of PPE To be vaccinated against common infectious diseases
	Practical Practical	Total WBCs and RBCs counting
	Bio Medical Waste Manageme nt	 To gain understanding of importance of proper and safe disposal of biomedical waste &treatment To gain understanding of categories of bio-medical waste To learn about disposal of bio-medical waste – color coding, types of containers, transportation of waste, etc.
	Practical	 To gain broad understanding of means of bio- medical waste treatment Practical demonstration and classification of biomedical waste

8.	Introduction to Bacteriology, Immunology and Serology	 To gain Broad Understanding about Introduction to Microbiology Understand common methods of sterilization & disinfections Understand cultivation of bacteria Basic Imunology and common immune diseases To gain Broad Understanding about Immunology and Serology
	Practical	Culturing and platingGram staining
9.	Clinical Pathology: Blood group	 Understand ABO blood group system in detail Understand Rh blood group system in detail Understand other blood group systems in brief Understand methodology to identify blood groups
	Practical	 Hematology analysis: By running the QC & test sample Blood group: Interpretation
10.	Introduction to Clinical Pathology	 Erythroid series cell formation, Function and their normal cell count & their variation? Reticulocyte count? Different stain preparation
	Practical	 Introduction to analyzer: Clinical pathology Serum and plasma separation Liver function test and Kidney function test
11.	Post mortem Observing & Reporting	Dummy necropsy and sample collection for histopathology
	Practical	Postmortem examinationPost mortem report preparation
12.	Introduction to Histopathology	Preservation and fixationHistopathology process and its principles
	Practical	Histopathology techniques
13.	Infection control and prevention	,
	Practical	 Preparation of Histopathological slide (S) H and E staining
		_
14.	Special Staining	_
	Practical	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS
	Practical Introduction to Cytopathology	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis
15.	Practical Introduction to Cytopathology Practical	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology
15.	Practical Introduction to Cytopathology	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis Blood smear preparation
15. 16.	Practical Introduction to Cytopathology Practical Practical Fine needle aspiration	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis Blood smear preparation Staining of blood smear Use and demonstration of diagnostic kits
15. 16.	Practical Introduction to Cytopathology Practical Practical Fine needle	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis Blood smear preparation Staining of blood smear Use and demonstration of diagnostic kits Biopsy or cytology staining Understand the purpose of fine needle aspiration Understand about HP section cutting and staining
15. 16. 17.	Practical Introduction to Cytopathology Practical Practical Fine needle aspiration Practical Introduction to	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis Blood smear preparation Staining of blood smear Use and demonstration of diagnostic kits Biopsy or cytology staining Understand the purpose of fine needle aspiration
15. 16. 17.	Practical Introduction to Cytopathology Practical Practical Fine needle aspiration Practical	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis Blood smear preparation Staining of blood smear Use and demonstration of diagnostic kits Biopsy or cytology staining Understand the purpose of fine needle aspiration Understand about HP section cutting and staining Hand on practice
15. 16. 17.	Practical Introduction to Cytopathology Practical Practical Fine needle aspiration Practical Introduction to Parasitology, Mycology and	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis Blood smear preparation Staining of blood smear Use and demonstration of diagnostic kits Biopsy or cytology staining Understand the purpose of fine needle aspiration Understand about HP section cutting and staining Hand on practice Describe the in brief various pathogenic organism Bacteria, Virus, parasite and fungi Identification of various blood cells?
15. 16. 17.	Practical Introduction to Cytopathology Practical Practical Fine needle aspiration Practical Introduction to Parasitology, Mycology and Virology Practical Stool	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis Blood smear preparation Staining of blood smear Use and demonstration of diagnostic kits Biopsy or cytology staining Understand the purpose of fine needle aspiration Understand about HP section cutting and staining Hand on practice Describe the in brief various pathogenic organism Bacteria, Virus, parasite and fungi
15. 16. 17.	Practical Introduction to Cytopathology Practical Practical Fine needle aspiration Practical Introduction to Parasitology, Mycology and Virology Practical	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis Blood smear preparation Staining of blood smear Use and demonstration of diagnostic kits Biopsy or cytology staining Understand the purpose of fine needle aspiration Understand about HP section cutting and staining Hand on practice Describe the in brief various pathogenic organism Bacteria, Virus, parasite and fungi Identification of various blood cells? Clinical importance of blood cells? Importance of stool examination Describe source of error/interference /quality of work and initiate corrective action as applicable
15. 16. 17.	Practical Introduction to Cytopathology Practical Practical Fine needle aspiration Practical Introduction to Parasitology, Mycology and Virology Practical Stool	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis Blood smear preparation Staining of blood smear Use and demonstration of diagnostic kits Biopsy or cytology staining Understand the purpose of fine needle aspiration Understand about HP section cutting and staining Hand on practice Describe the in brief various pathogenic organism Bacteria, Virus, parasite and fungi Identification of various blood cells? Clinical importance of blood cells? Importance of stool examination Describe source of error/interference /quality of work and initiate corrective action as applicable Describe assessment of results to initiate follow-up testing
15. 16. 17.	Practical Introduction to Cytopathology Practical Practical Fine needle aspiration Practical Introduction to Parasitology, Mycology and Virology Practical Stool	 Safe and comfortable sample collection Describe importance and methodology of cleanliness, and hygiene environment in collection space Special staining: Masson trichrome for collagen, staining for fat, PAS Explain basics of cytology / cytopathology Basics of staining and its requirement during diagnosis Blood smear preparation Staining of blood smear Use and demonstration of diagnostic kits Biopsy or cytology staining Understand the purpose of fine needle aspiration Understand about HP section cutting and staining Hand on practice Describe the in brief various pathogenic organism Bacteria, Virus, parasite and fungi Identification of various blood cells? Clinical importance of blood cells? Importance of stool examination Describe source of error/interference /quality of work and initiate corrective action as applicable

Advanced	Updated on advanced techniques and future trends in field of diagnostic microbiology Updated on advanced techniques and future trends infield of molecular diagnostic technique
Practical •	Molecular diagnostic techniques practical Immunohistochemistry
21. Introduction to Advanced techniques and future trends in laboratory science-II	Principles of PCR
Practical •	RT-PCR
22. Urology •	Importance of urine examination Preservation of Urine
Practical •	Analysis of urine, & report preparation Macroscopic and microscopic
23. Soft Skills and Communications	Able to handle effective Communication with Peers/colleagues using medical terminology in communication Learn problem solving
Practical •	Opportunity of pathological skill

CERTIFICATION

The certificate will be issued to the successful candidates for the course

IMPORTANT DATES:

Receiving of application by E-mail (last date): 09/06/2024

Intimation to selected candidates: 10/06/2024

Fee submission (last date): 13/06/2024

Course Start: 19/06/2024

Kindly send Application by E-mail only (sdp@cdri.res.in)

For more details and registration, kindly visit the link; https://www.cdri.res.in/skilldevelopment.aspx
